Lab 1 Report – Ryan King

Setups Used

I used both the raspberry pi and WSL. I did the initial setup as instructed in the raspberry pi and then set up everything again in WSL to make coding easier.

Code Repos Used

Example repo: https://github.com/espressif/esp-idf/tree/master/examples/get-started/blink#readme

Though no code was copied directly from this site, I used it to understand how the led_strip_set_pixel function works:

https://components.espressif.com/components/espressif/led_strip
